

Using LLMs: Summarization of meeting minutes in Indico

Dominic Hollis & Tomas Roun - Indico Team

IT-CA Group Meeting - 21st Oct. 2025

The current problem

- Users are compiling meeting minutes in Indico (great!)
- ...just to send it to another meeting
- Manually extracting relevant minutes is tedious
- Trying to get a summary of the minutes is time-consuming

What can we do about it?

What can we do about it?

- Abolish meetings? (not likely)

What can we do about it?

- Abolish meetings? (not likely)
- Hire more staff? (expensive)

What can we do about it?

- Abolish meetings? (not likely)
- Hire more staff? (expensive)
- Use Large Language Models (LLMs) to summarize minutes? (interesting...)

What can we do about it?

- Abolish meetings? (not likely)
- Hire more staff? (expensive)
- Use Large Language Models (LLMs) to summarize minutes? (interesting...)
- Use emails instead? (nope)

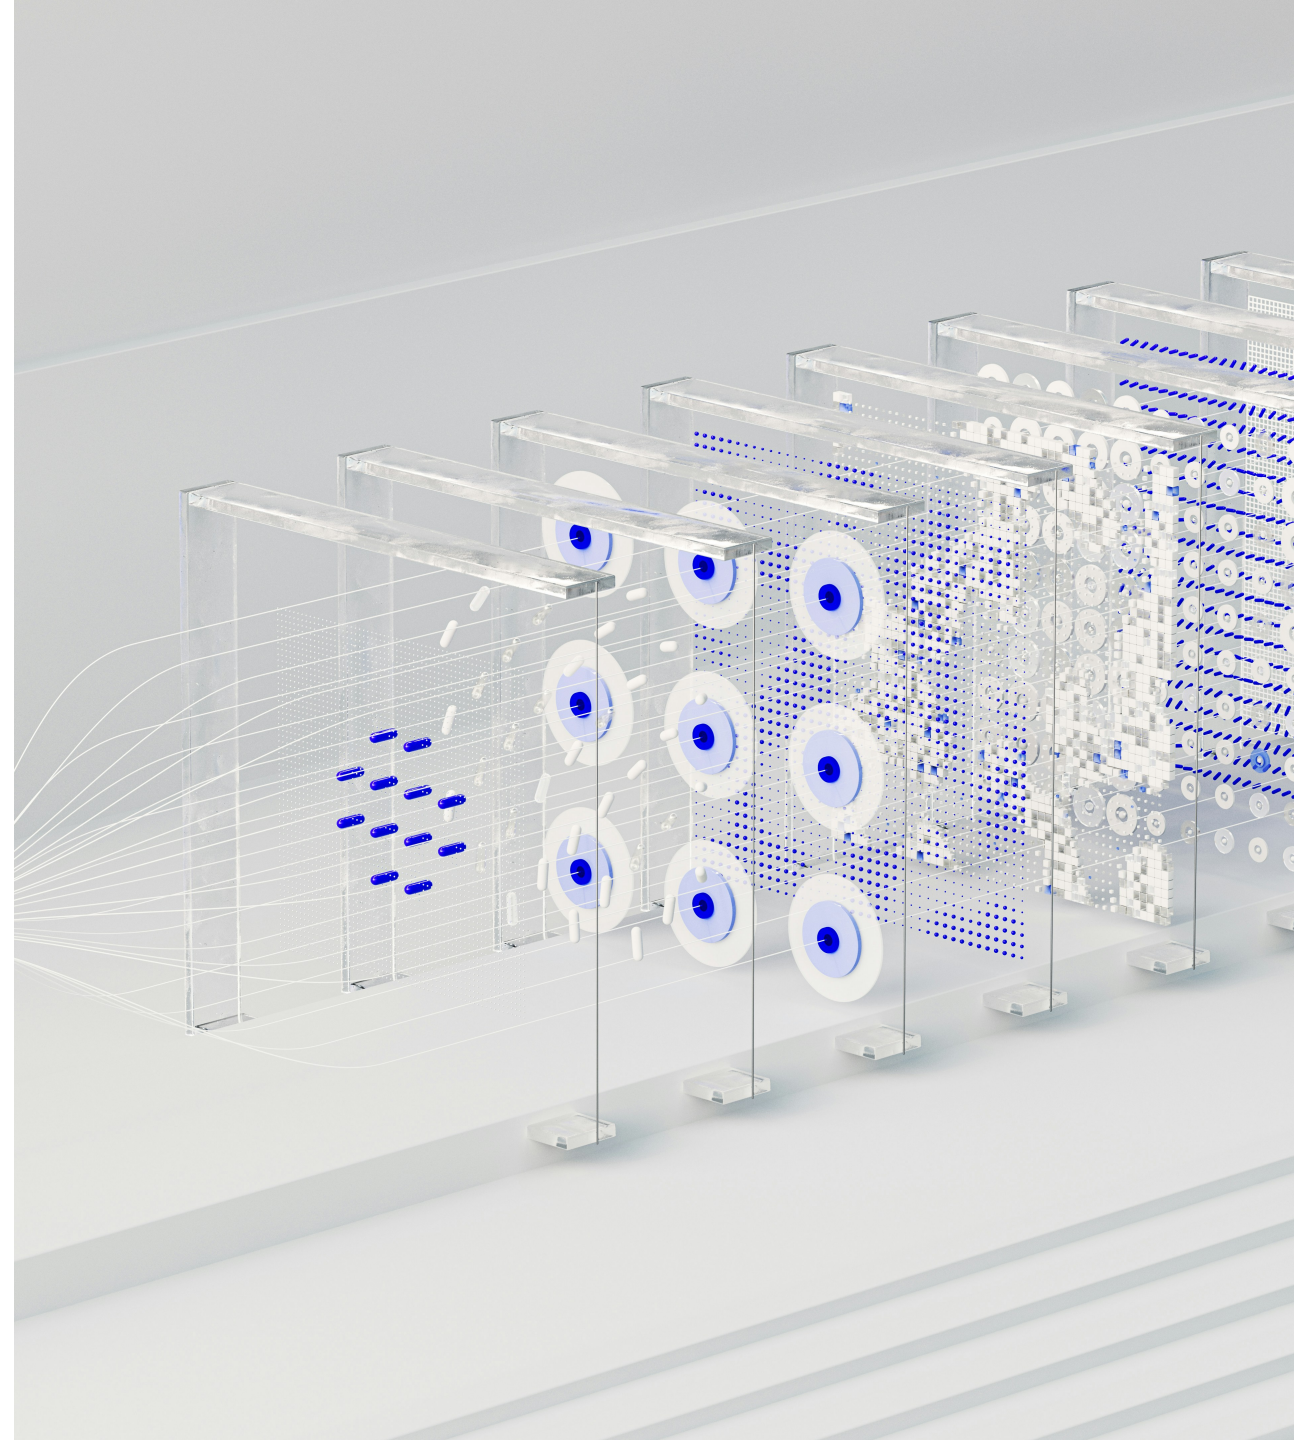

What can we do about it?

- `<span class="muted">Abolish meetings? (not likely)</span>`
- `<span class="muted">Hire more staff? (expensive)</span>`
- `<strong>✔ Use Large Language Models (LLMs) to summarize minutes? (interesting...)</strong>`
- `<span class="muted">Use emails instead? (nope)</span>`

Why LLMs?

- Powerful text processing capabilities
- Can generate human-like summaries
- Can be integrated into existing workflows
- Potential to save time and effort for users

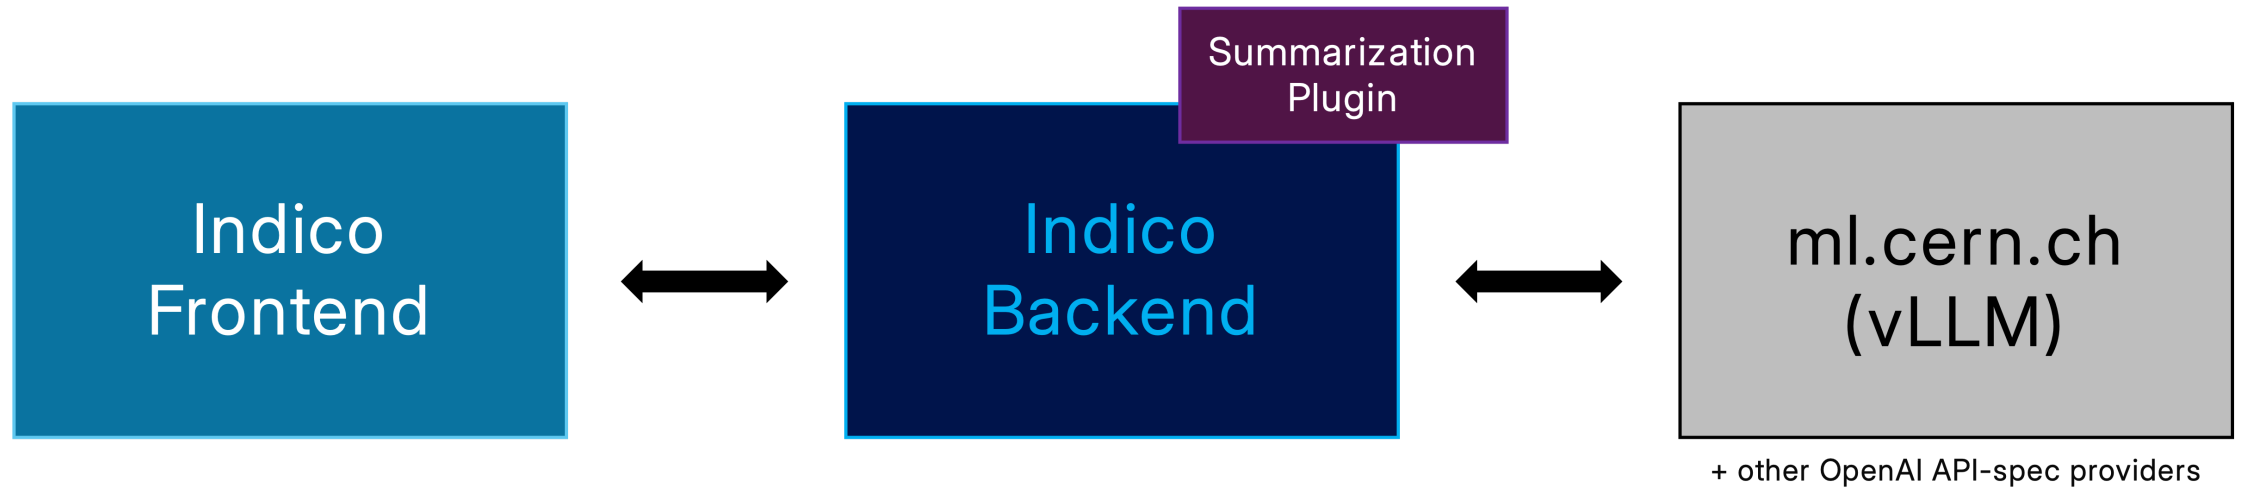

Summer student project

- Idea proposed in early 2025
- Summer student: Zeynep Çaysar
- Masters A.I. student @ UZH
- Developed a prototype summarization feature
- Integrated with Indico's meeting minutes system

Demo

Overview

Future work

- Get this on prod by late 2025/early 2026
- Tweak mode (take a generated summary and ask for modifications)
- Maybe something else? 🤔
